

Thirty Days Wild

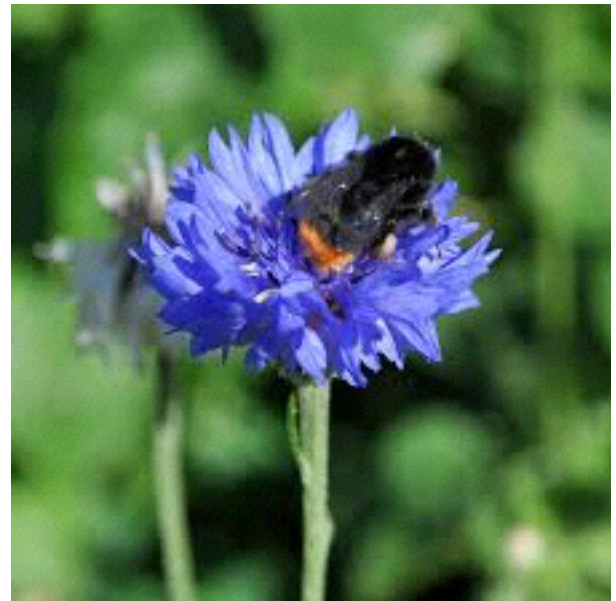

by Eddie Barnes

Day 28

We saw lots of insects today and found out that we don't like ALL wild things.

First we saw one of our lovely bees with his legs covered in pollen. He was great.

We saw lots of bees on the cornflowers that we had grown.

BUT we were NOT very happy when we saw little beetles all over one of my bean plants!!

They are called Black Fly. We need lots more ladybirds in the garden to eat them up!

The rest of our garden has gone really wild

But we found lots of good things.

We found that the wildflowers we had seeded had grown.

We found lots of apples growing,

and YUMMY baby plums.

I found beautiful elderflowers. Mum said that they will make lots of berries for the birds.

Our wild garden. Next year it will be full of wildflowers!
