

30 Days Wild by Eddie Barnes

We bought lots and lots of wildflower seed packets this year and they didn't grow! Just lots of thistles! I think we need to pull them up.

We think it is because it didn't rain and we forgot to water the seeds.

There was just one kind of flower, its very pretty and mum says it wasn't even in the seed packet!

It should look like this, ha ha

Last year was the same. My big brother dug up a great big bit of garden and we put in wildflower seeds. Now it's just long grass except for a 2 flowers!

By the ditch we've got lots and lots and lots of flowers growing (called Rosebay Willowherb) and we didn't plant them at all!

We went to have a look at my vegetable garden. OH DEAR! It looks a stupid mess!

We've been very busy with other things this year.

We had a look in my garden to see if there were any wildflowers.

There's a big patch of cornflowers, it looks nice

There are some umbellifers, and some brambles (the bees like them)

and a lovely white flower called white campion.

The polytunnel is wild inside too, but lots of grapes are growing there and lots of a purple wild flower which we found out was called Common Mallow

We learnt about a lots of wildflowers today.

We have got a lots of messy bits on the garden, but we have got bees and butterflies and the birds sing like mad so maybe it's ok really.
